

EXPERIMENT 7b – DATA VISUALIZATION USING TABLEAU

Aim:

To perform data analysis, data preparation, and visual exploration on the **Tourism Dataset** in Tableau Desktop to analyze tourist locations, visitor patterns, ratings, revenue, countries, and tourism categories for useful tourism insights.

Algorithm:

1. Data Ingestion & Connection

Connect Tableau Desktop to **tourism_dataset (1).csv** as a text file source.

Verify the field data types:

- Location → String
- Country → String
- Category → String
- Visitors → Integer
- Rating → Decimal Number
- Revenue → Decimal Number
- Accommodation_Available → String/Boolean

2. Data Cleansing & Transformation

Handle missing or null values across important columns such as:

- Location
- Country
- Category
- Visitors
- Rating
- Revenue

Remove duplicate records and correct incorrect data types.

Create calculated fields for key metrics such as:

- Total Visitors
- Average Rating
- Total Revenue

3. Exploratory Visual Analysis

Create visualizations to explore the tourism dataset and understand patterns among tourist locations, visitors, ratings, and revenue.

4. Visitor and Revenue Analysis

Analyze the relationship between **Visitors and Revenue** using charts.

Identify tourist locations with:

- Highest number of visitors
 - Lowest number of visitors
 - Highest revenue
-

5. Country and Category Analysis

Analyze tourism data based on:

- Country
- Category
- Tourist Locations

Compare visitor counts, ratings, and revenue across different countries and tourism categories.

6. Rating and Tourism Trends

Analyze tourist location ratings and compare them with visitor counts and revenue. Identify highly rated tourist locations and observe tourism patterns.

7. Dashboard Assembly & Formatting

Combine all important worksheets into an interactive **Tourism Dashboard**.

Apply global interactive filters such as:

- Country
- Category
- Accommodation Availability

Use the dashboard to provide useful insights about tourist locations, visitor patterns, ratings, and tourism revenue.
